Computer Science Engineer | Open to Full-Time Opportunities

Career Objective

Motivated Computer Science and Engineering graduate with hands-on experience in software development, IoT systems, and web applications. Proficient in Python, Java, C/C++, and SQL, with practical exposure to database systems. Developed multiple academic and real-world projects demonstrating problem-solving and system design capabilities. Seeking a full-time opportunity to apply React and web development skills to build user-friendly interfaces while growing within a collaborative team environment.

Technical Skills

Programming & Scripting: Python, C, C++, Java, SQL

Software Development: Object-oriented programming, Data structures

Databases: MySQL, Database design fundamentals, Query optimization basics

AI & Cybersecurity: Machine Learning Fundamentals, Large Language Models (LLMs),

Web & Frontend Development: HTML5, CSS3, JavaScript

Tools & Platforms: Git, GitHub, VS Code, Google Colab, XAMPP

IT Tools: MS Word, Excel, PowerPoint, Power BI

Soft Skills: Analytical thinking, Communication, Team collaboration, Adaptability, Fast learning ability

Experience

JAAGO Foundation

Feb 2026 – May 2026

Intern

Banani, Dhaka

- Worked on feature integration and customization in the Odoo system to improve organizational workflows.
- Assisted in data entry and management of child profiles, ensuring accuracy and completeness.
- Collaborated with multidisciplinary teams, enhancing teamwork and communication skills.
- Received a Letter of Recommendation for strong performance, professionalism, and teamwork.

Education

Ahsanullah University of Science and Technology (AUST)

Jun 2021 – Jun 2026

Bachelor of Science (B.S.) in Computer Science and Engineering

CGPA: 2.6

Dhaka Residential Model College (DRMC)

2020

Higher Secondary Certificate (Science)

GPA: 5.00

Dhaka Residential Model College (DRMC)

2018

Secondary School Certificate (Science)

GPA: 5.00

Academic Projects

Billing Management System (Java, JFrame)

Developed a GUI-based desktop billing application to automate bill generation, product management, and real-time total calculation using Java Swing (JFrame).

LearnHub – E-Learning Platform (HTML, CSS, XAMPP)

Designed and developed a full-stack e-learning website with user authentication, course enrollment, feedback system, and admin management dashboard.

Home Rent Application (Android, Java, Firebase)

This project was made in Android Studio and Java as the back end language. We developed a home rent application system to meet the needs of the renters and owners. And it helped both renters and owners to rent home.

2D Game Rangers (C,C++, OpenGL(iGraphics))

Developed a 2D side-scrolling action game featuring multiple levels with diverse enemy types including birds, monsters, and zombies. Implemented core game mechanics such as player movement, combat, a boss fight, life/score tracking, background music, and an interactive menu system.

IoT Defense: Military Base Security System (Arduino UNO)

Engineered an IoT-based security system capable of detecting gas leaks, fire hazards, and unauthorized motion with real-time alerts via LCD, LEDs, and buzzer.

Undergraduate Thesis

A Privacy-Aware Decentralized Framework for Intellectual Property Preservation and Trading Using Private Blockchain, IPFS, and NFTs

- Designed a decentralized architecture for secure intellectual property (IP) preservation and trading using private blockchain infrastructure.
- Integrated IPFS (InterPlanetary File System) for distributed file storage ensuring data immutability and redundancy.
- Implemented NFT-based ownership verification to enable transparent and tamper-resistant IP transactions.
- Focused on privacy-preserving mechanisms to protect sensitive creator data while maintaining system transparency.

Extracurricular Activities

Sub Executive – AUST Sports Club

Dec 2022 – July 2023

Organized university sports events, coordinated with team members for logistics and scheduling, and contributed to club operations and event execution.
